### **About This Content**

Motorland Tale is the story of how the boy Knaus gets himself into the expedition to the moon that leaves him crashlanded and confused in the land of World to the West.

This 20 page comic takes place in Motorland. The only nation in the world that knows how to make coal and steam work for them to build a true nation of industry, efficiency and mass production.

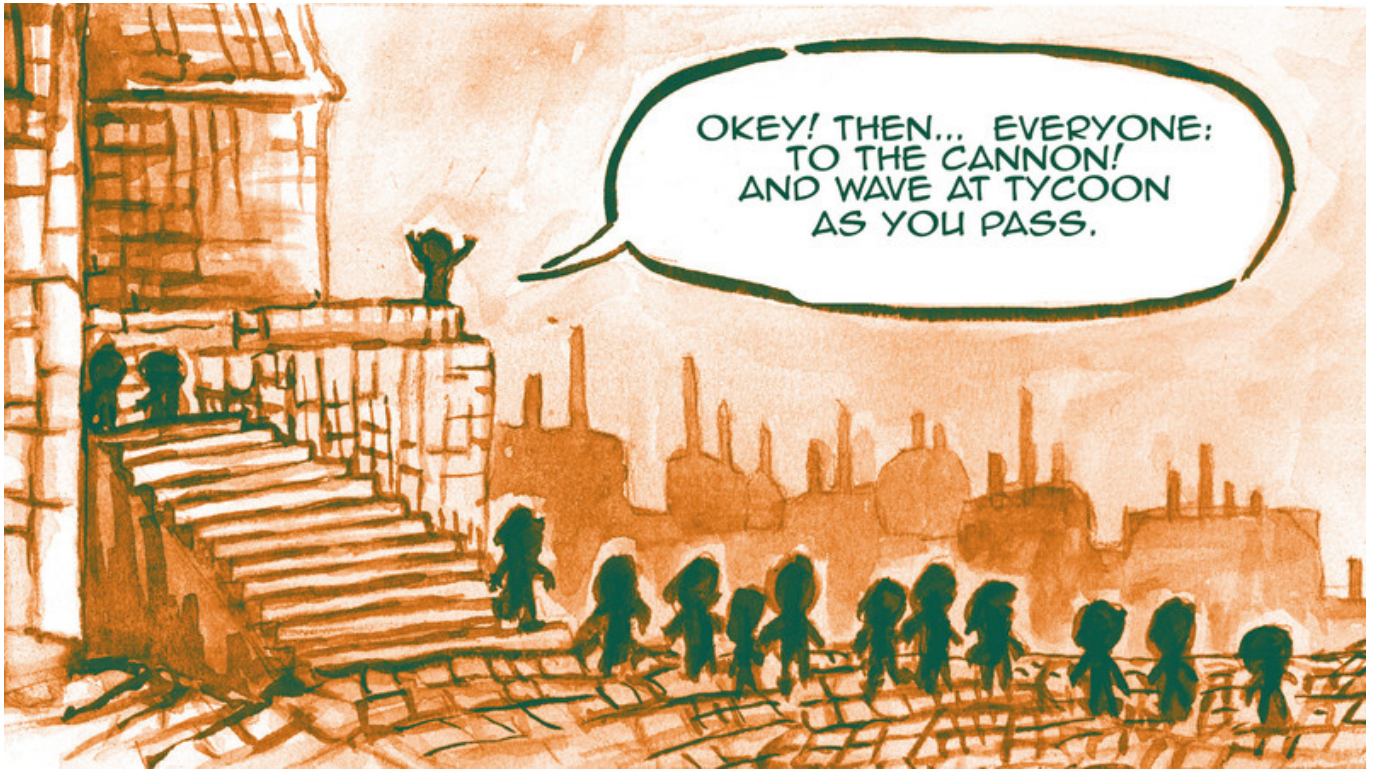

Unfortunately the hunger of this industrial machine drives the nation ever onward in their never ending quest of securing more resources for the gluttonous furnaces, and oft time morals and other such concerns can be put to the wayside for the needs of the nation and it's barons of industry.

Motorland Tale is very interesting, although short, being short is not necessarily bad, but the way it gives us more of a world so interesting makes us want more and more. The design is very beautiful and the colors give a special charm to each page. If you, like me, were enchanted by the world of Teslagrad and World to the West, you will surely enjoy this comic.
